

KJ-01: raw image to measured 2D instances (KJ-01_z005_stages)

KJ-01 z005: Saturn v5.7.1 production stages

Raw image

Foreground probability

Core probability

Filled foreground mask

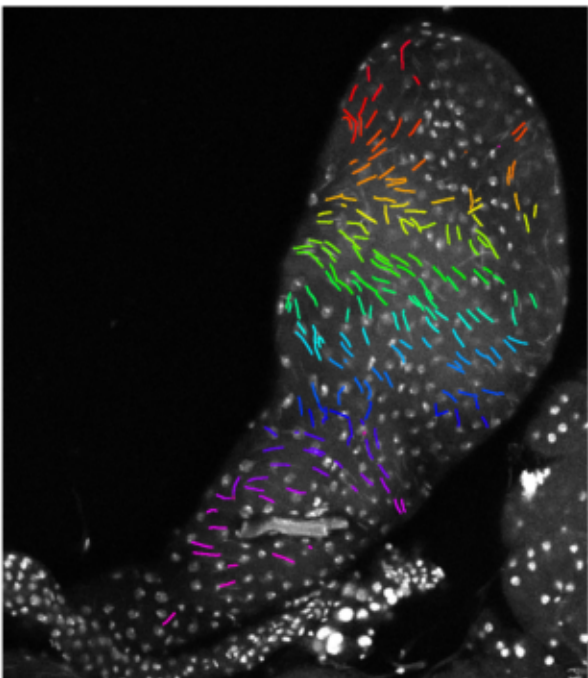

Instance boundaries

Measured centerlines

Final production overlay

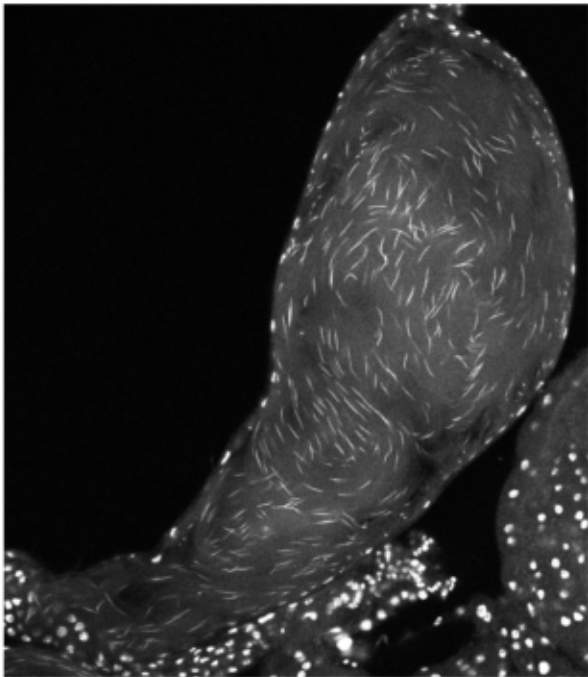

All panels use the same ROI crop and identical pixel framing.

All stage panels use the same ROI crop and pixel framing.

KJ-01: raw image to measured 2D instances (KJ-01_z035_stages)

KJ-01 z035: Saturn v5.7.1 production stages

Raw image

Foreground probability

Core probability

Filled foreground mask

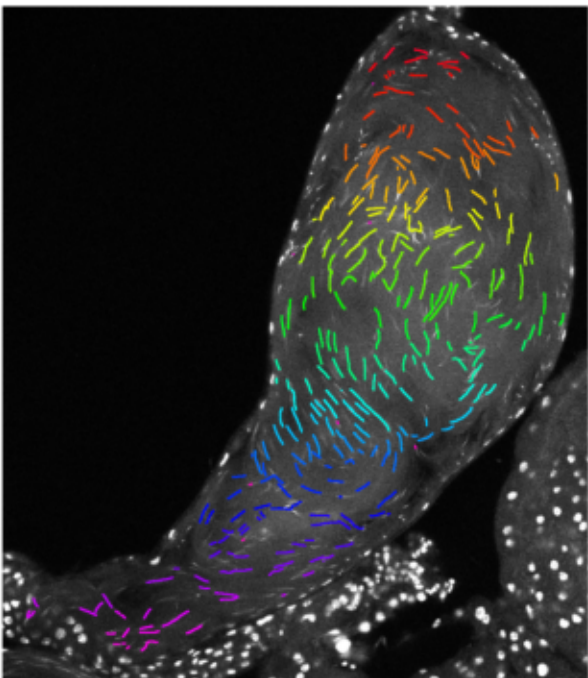

Instance boundaries

Measured centerlines

Final production overlay

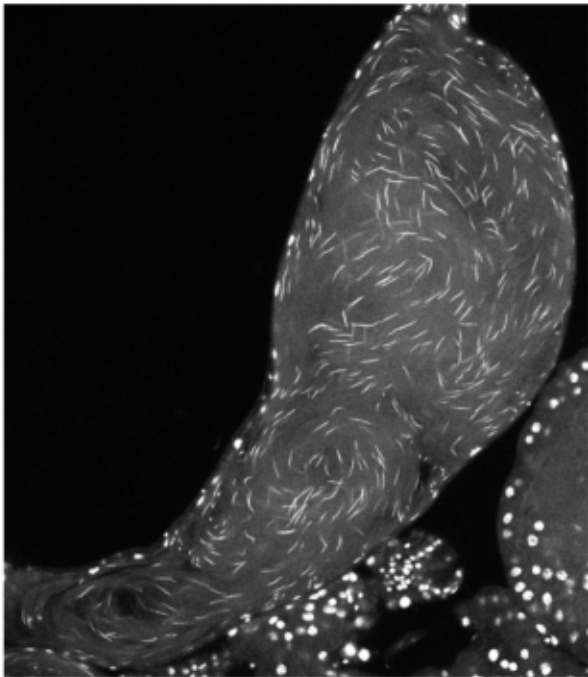

All panels use the same ROI crop and identical pixel framing.

All stage panels use the same ROI crop and pixel framing.

KJ-01: raw image to measured 2D instances (KJ-01_z060_stages)

KJ-01 z060: Saturn v5.7.1 production stages

Raw image

Foreground probability

Core probability

Filled foreground mask

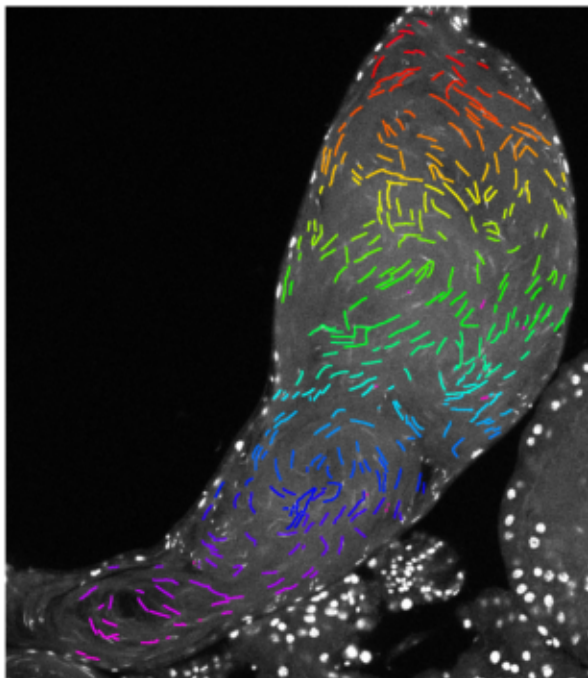

Instance boundaries

Measured centerlines

Final production overlay

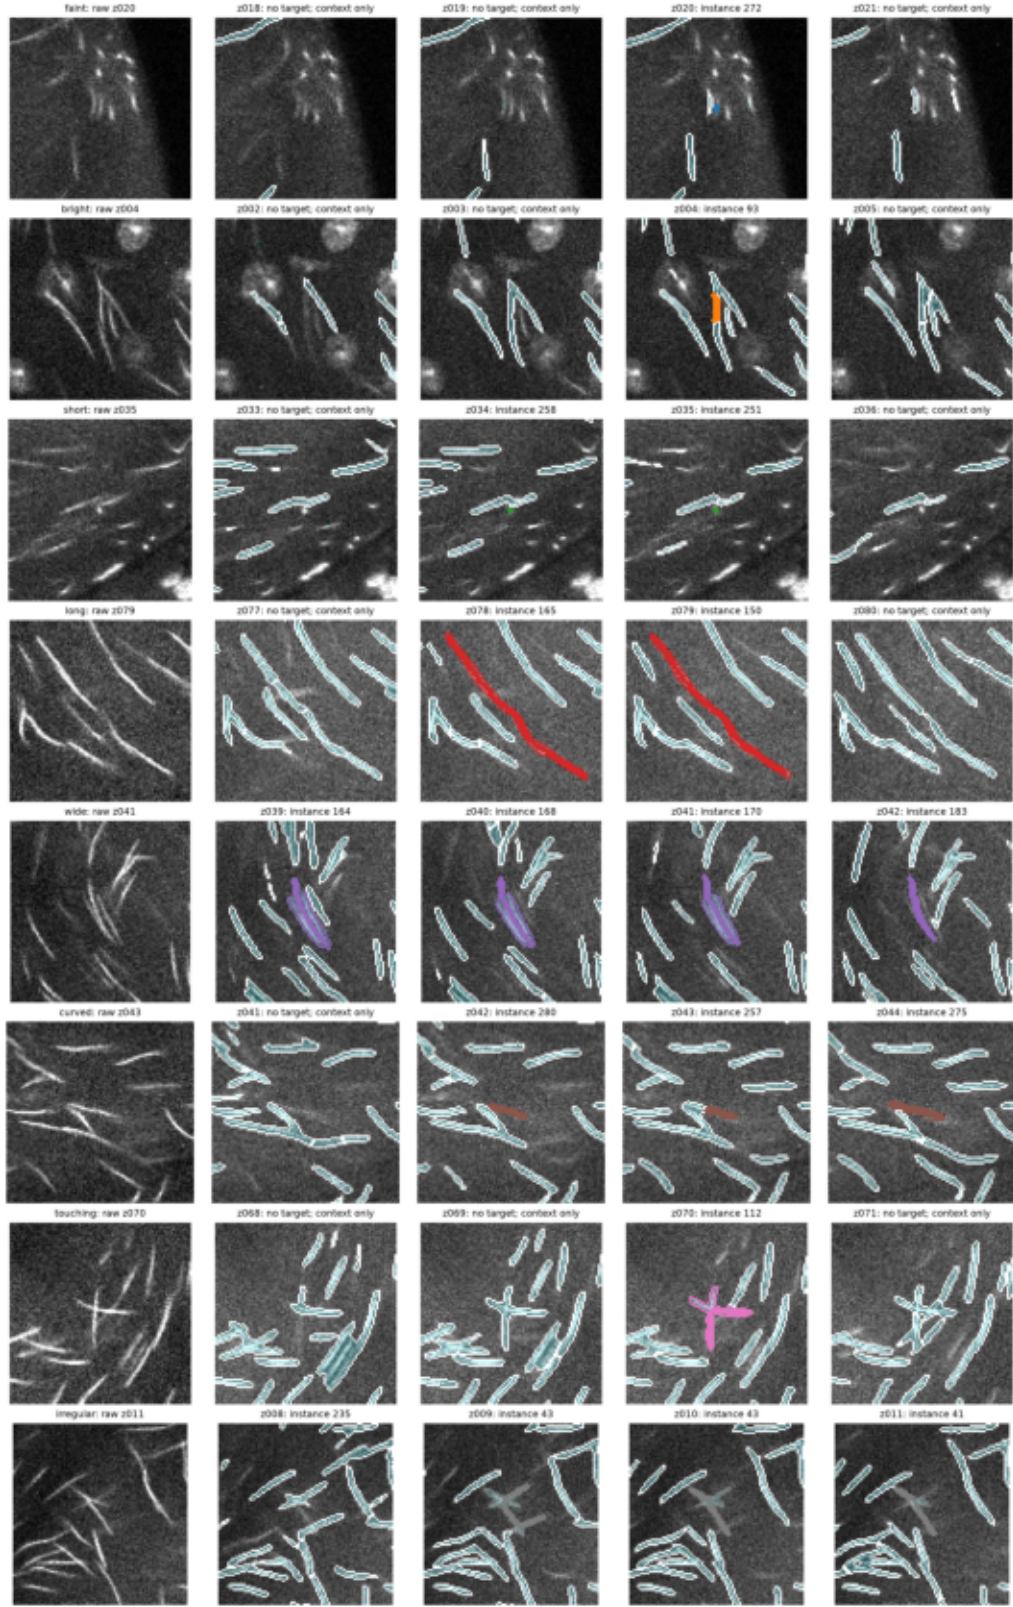

All panels use the same ROI crop and identical pixel framing.

All stage panels use the same ROI crop and pixel framing.

KJ-01: cross-slice identity and instance-geometry evidence

KJ-01: stratified v5.7.1 tracking evidence
First panel is unobscured raw data. Cyan is U-Net support; white marks neighboring instance boundaries; track color marks target mask, boundary, and centerline.

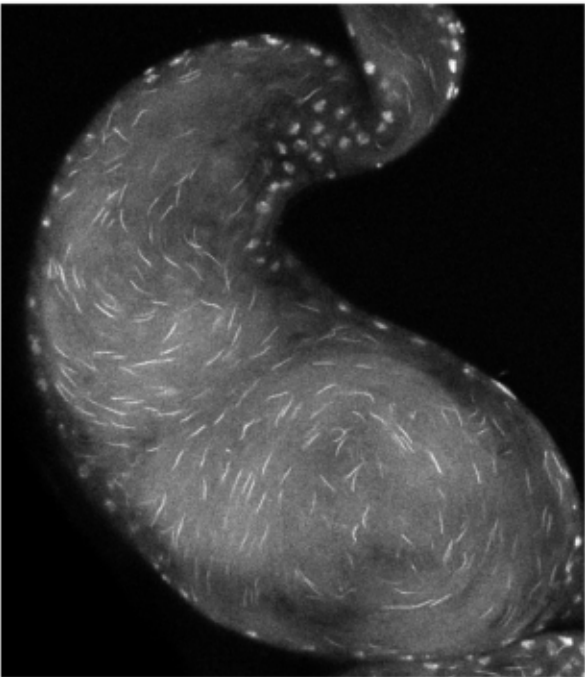

Cyan is U-Net support; white is neighboring boundaries; track color is target mask/boundary/centerline.

WT-01: raw image to measured 2D instances (WT-01_z005_stages)

WT-01 z005: Saturn v5.7.1 production stages

Raw image

Foreground probability

Core probability

Filled foreground mask

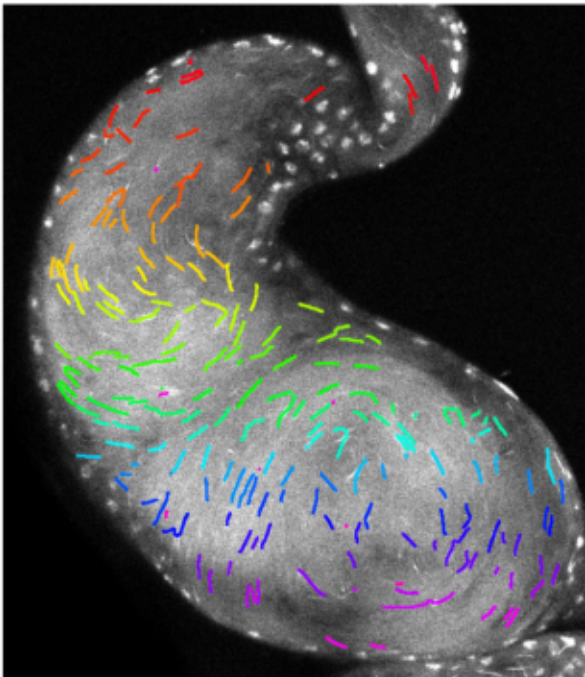

Instance boundaries

Measured centerlines

Final production overlay

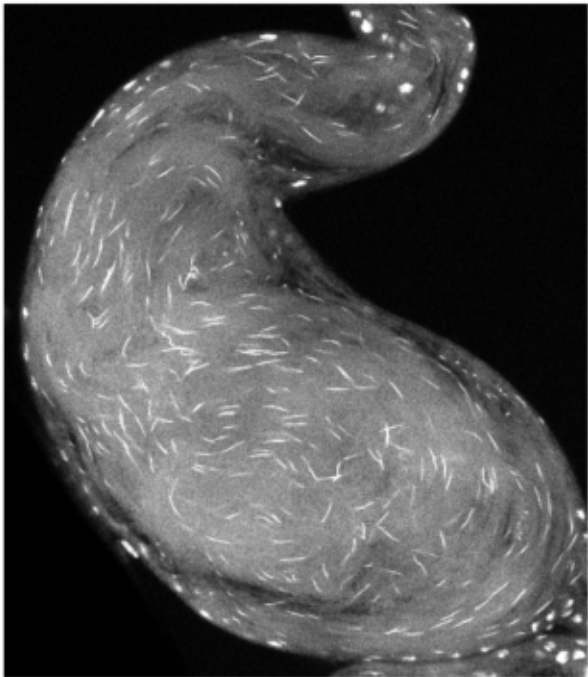

All panels use the same ROI crop and identical pixel framing.

All stage panels use the same ROI crop and pixel framing.
